Dr. Ransom does a great job of presenting complex material in ways that aren't intimidating. I have learned so much from his class.

All of the problem sets and readings we were given have been very beneficial and have proved helpful on our tests. They are well done and get you to think critically about the concepts learned in class and truly cement the lessons and concepts.

21. If you have additional comments or suggestions regarding the learning environment in this course, please share them here:

One of my favorite classes every in terms of learning environment. His class is honestly so much fun because he lets us share our experiences as they relate to education economics and there's lot of laughter while also being productive. It's a great balance of feeling laid back and comfortable in class but also learning a lot.

The style of teaching in this class is fun and engaging and lends to learning the content not just knowing it for an exam. He uses examples and aids to provide a better understanding of the concepts and helps further our thinking on the material.

22. If you have comments or suggestions regarding inclusion, diversity, and equity in this class, please share them here. These might include comments or suggestions regarding the sources and/or perspectives of material covered in class, student-instructor interactions, or any other aspect of the course that you found particularly positive or negative.

Dr. Ransom makes everyone feel heard and values all perspective.

24. Which elements of this course had the most positive impact on your engagement and/or learning?

Probably the class discussions and how engaging they are. Great class overall

The way the course is taught is very well done due to the engagement that is done with the students and lends to understanding not just repeating it on a test or assignment.

I think I liked the lectures the most and found them the most helpful. The book was hard to understand and confusing

The lecture and course structure were all very interesting and helped my learning in this class. I also genuinely enjoyed our packback discussions which surprised me because I usually dislike discussion boards. I think our class engagement was truly the best part of the class as I've not had an econ class where we had daily fun and engaging discussions like this course.

Class discussions and homework

25. Which elements of this course could be improved to have a more positive impact on your engagement and/or learning?

The class discussions that we have on Packback are very interesting and I like them, but I don't really see the necessity of Packback specifically as the platform for them. I think they could happen just as easily on Canvas discussion boards and save us all \$30. Also the problem sets can be annoying sometimes in that they cover stuff that never comes up in class or in exams. They are def the hardest part of the class, but still not too bad overall

I think the problem sets could be dumbed down a bit, they are pretty difficult. Everyone I talked to struggled with these a lot.

Cannot think of anything at this time.
